

**Submersible drainage pump
with cooling jacket
for clear and drainage water.**

Chromatic C250 WE

Application

Pump for conveying clean or soiled water.

Cellar draining, keeping trenches, shafts and rooms dry. Domestic waste water disposal in cellar rooms (e.g. wash-basins, showers, washing machines). Reduction of surface water. Emergency deployment for flooding. Water extraction from watercourses or reservoirs for irrigation.

A cooling jacket with discharge connector at the top ensures sufficient motor cooling even at low water level (sip operation). The built-in float switch with extremely small construction width allows automatic operation even in particularly narrow shafts. Automatic ventilation with additional air vent screw. Removable strainer allows extraction of residual water down to 5 mm. Automatic purging device can be implemented.

Installation: Stationary or mobile.

Pumped medium: Clear- or drainage water containing solids up to 10 mm particle size. Max. temperature of pumped medium: 35°C, for brief periods up to 60°C.

Operating mode: Continuous operation (S1), at medium temperature 36- 60°C: Intermittent operation (S3 30%).

Design

Submersible pump, consisting of:

Pump: Single-stage centrifugal pump with vertical discharge and integrated non-return valve.

Impeller: Open multi-blade impeller, free passage 10 mm.

Motor: Pressure watertight, medium-immersed motor.

Stainless steel motor housing.

Insulation class B, Protection rating IPX8. Thermal sensor for temperature monitoring in the winding.

Connecting cable: H07RN8-F 3G1.

Shaft/bearing: strongly dimensioned chrome steel motor shaft, lifetime-lubricated roller bearings.

Seal: Shaft seal with triple radial shaft seal and ceramic-coated sealing surface.
